

Lean Tool Kit Workshop

Continuous Improvement Essentials

A five-day workshop covering lean tools and how they can be integrated as business strategies to achieve improved operational results.

Key Learning

- Participants are provided an overview of the lean roadmap and the Kaizen Breakthrough Methodology
- How policy deployment drives the lean implementation process
- Lean Tools covered include: value chain mapping, waste identification, takt time and process balancing, pull systems and kanban, jidoka, set-up reduction, total productive maintenance, quality, Sigma Kaizen and 5S
- Extending lean into the value chain
- Factory simulations and workshop exercises

Who Should Attend

- Executives, managers, supervisors, continuous improvement leaders, engineers and shop floor personnel.

Pricing

- Individual: \$3,450
- Group: \$2,950 each (three or more)

We can conduct this workshop onsite at your facility for groups of 10 or more.

Prerequisite

Students are required to complete the Essential Lean Learning online training modules and pass the final exam as a prerequisite to the Lean Tool Kit workshop. The online course consists of 12 web-based modules and takes no more than 6 hours to complete. Each module is self-paced and can be completed at your convenience. There is no additional fee.

Unconditional Guarantee

TBM guarantees 100% satisfaction. If for any reason you are not satisfied with a LeanSigma Institute workshop, we will refund 100% of your fee.
