

# Quest for the Perfect Engine®

## Leveraging Lean for Competitive Advantage in the Garment Industry

A two-day workshop using discussion and interactive simulations that demonstrate how the LeanSigma® methodology provides a platform for effective change. Tailored specifically for senior-level managers in the garment industry looking to understand what it takes to drive a lean transformation.

### Key Learning

- How to start a lean initiative and sustain momentum.
- How the powerful combination of Lean and Six Sigma can be used to remove guesswork.
- How Lean methods quickly eliminate non-value-added activities and processes.
- Understand your company's improvement potential – and how you stack up versus your industry and the ideal Lean company.
- How to rally the organization around improvement objectives.
- The recommended sequence for your improvement activities.
- How to leverage lean as a strategy for innovation, differentiation and growth.

### Ideal Attendees

- Senior management including: Chief Executive Officers, Presidents, Chief Financial Officers and Chief Operating Officers.
- Operations management including: General Managers, Vice Presidents or Directors of Operations, Engineering, Continuous Improvement, Quality, Materials, Supply Chain and Human Resources.

### Two-Day Agenda

#### Day One

- Introduction of Lean transformation
- Case studies of successful lean companies
- Simulation 1: traditional manufacturing
- Introduction to Lean concept:
  - Value chain mapping
  - The seven wastes
  - Valued-added versus non-value-added activities
  - 5S
  - Lean Production System
- Simulation 2: One-piece flow, pull production, integrating Lean and Six Sigma

#### Day Two

- Lean Production System
  - Change over reduction methods
  - Production smoothing & mixed-model production
  - Material management by using pull, LeanSigma value chain
- Simulation 3: Pull system, mixed models
- Developing a culture to sustain your gains
- Business process kaizen
- LeanSigma product development
- Review of expectations
- Getting started and recommendations for next steps
